Description Raw organic honey, collected from the flowers of Linden trees growing in the Russia's Far East.

The honey is naturally crystallized, thick and dense, has white color.

The proposed honey has been extracted in the purest place on Earth - in the wilderness of the Russia's Far East taiga (100 km from the nearest settlement) by the "old believers" communities.

Linden honey has very intense aroma and is also revered for its miraculous healing powers.

The taste is very tender, sweet but not sugary, with long-lasting aftertaste. It is a true temptation: when you try it once you cannot help to take it more. )))
